

# ***God and Science: Where Does the Evidence Lead?***

**Steven R. Hemler, President**

# Challenges to Belief in God

- “There are few scientists, less than 10%, who believe in God.”
  - Sir Harold Kroto, Nobel Prize in Chemistry
- “Before we understand science, it is natural to believe that God created the universe. But now science offers a more convincing explanation.”
  - Stephen Hawking, World-Famous Physicist
- “Faith is belief in the absence of evidence. Believing when there is **no compelling evidence** is a mistake.”
  - Carl Sagan, World-Renowned Astronomer
- *Video: Challenges to faith in college*

# Facing the Challenges

- **Need to equip Christians:**
  - (1) Help those searching for answers to “big questions” (e.g., Does God exist?)
  - (2) Help meet St. Peter’s challenge:  
*“Always be prepared to give an answer to everyone who asks you to give the reason for the hope that you have.”* (1 Peter 3:15)
- **Strengthen** faith and help us **explain and share** our faith (apologetics)
  - *Video: Short “commercial break”*

# Apologetics

- **Learn new “language” of apologetics**
  - **Apologetics is the art of credibly, convincingly and compelling defending and sharing our faith**
- **Best survive challenges if our faith is built on a solid and objective foundation**

# “The Rest of the Story”

- **Scientific evidence that God exists:**
  1. **Big Bang**
  2. **Laws of Nature**
  3. **Fine Tuning of the Universe**
- ***Short Video Break***

# Alien Song

The big

300 thousand years

1 thousand million years

15 thousand million years

3 minutes

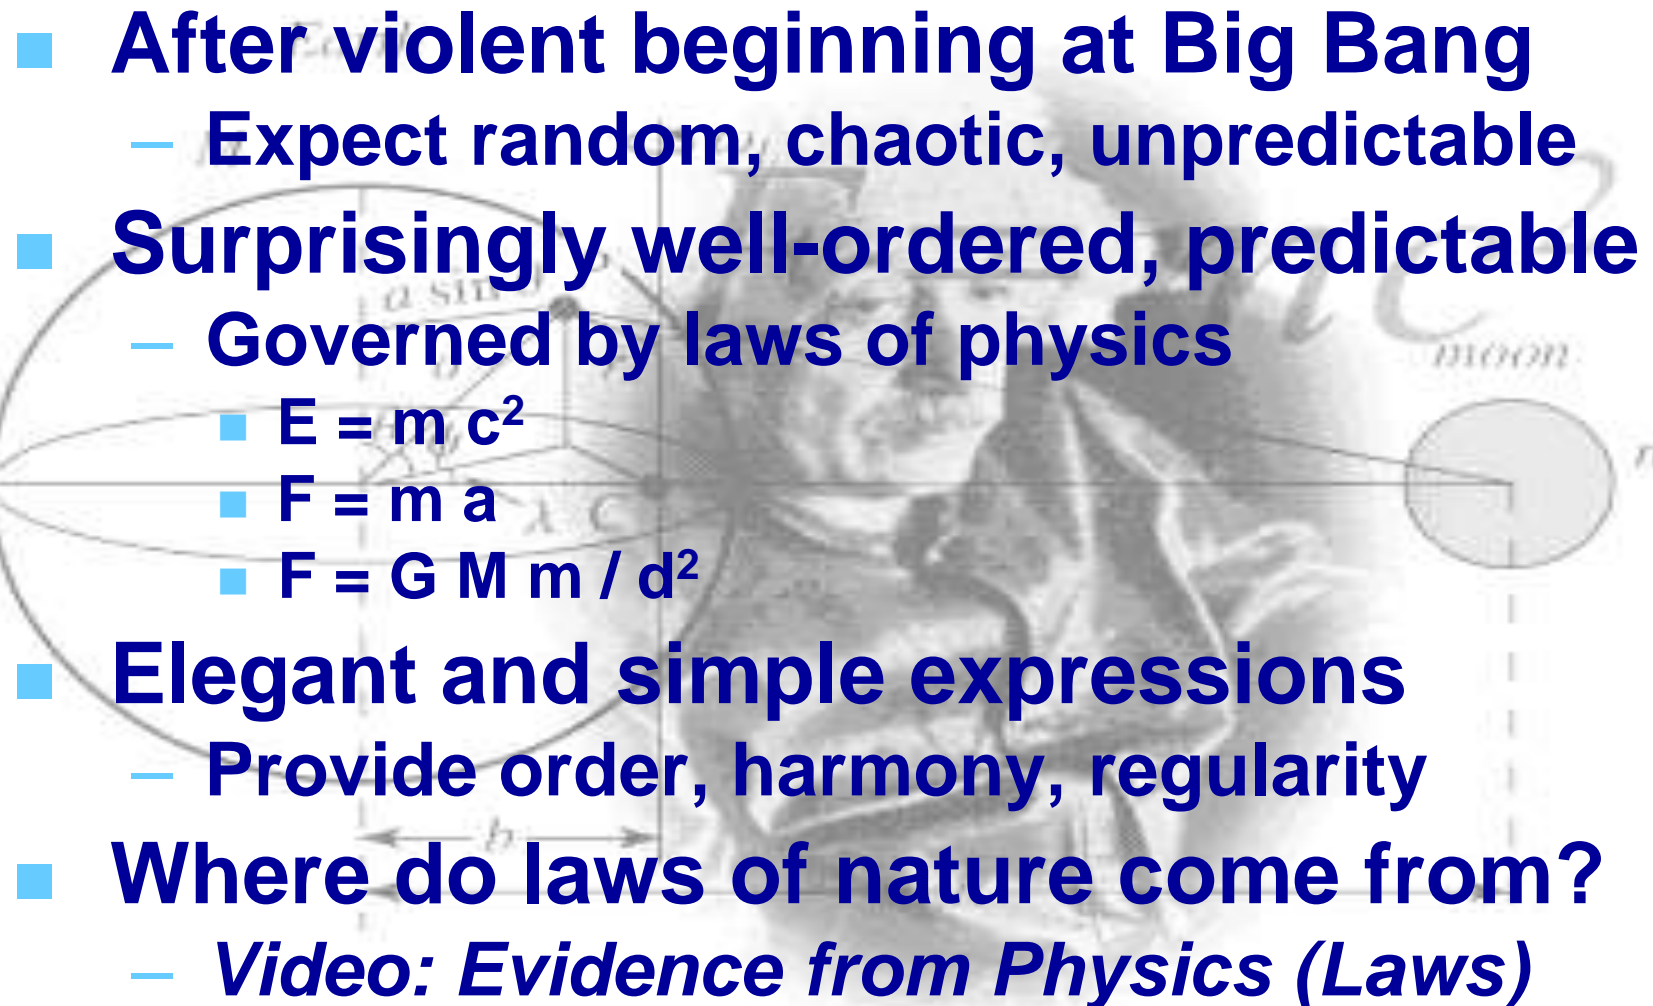

- **When universe came into existence**
  - Space, time, matter, energy
  - Began outward expansion
- **Proposed by Fr. Georges Lemaître (1927)**
  - Confirmed by Edwin Hubble (1929), etc.
    - Finite universe - not infinite, static, eternal
- **Big Bang: Universe had a beginning**
  - Evidence of transcendent Creator outside space and time who “ignited” Big Bang
- ***Video: Big Bang evidence that God exists***

# The Big Bang

- **Big Bang = “Let there be light” (Gen. 1:3)**
- **The Kalam Cosmological Argument:**
  - (1) Whatever begins to exist has a cause**
  - (2) The universe began to exist**
  - (3) Therefore, the universe has a cause of its existence**

# Laws of Nature

- After violent beginning at Big Bang
    - Expect random, chaotic, unpredictable
  - Surprisingly well-ordered, predictable
    - Governed by laws of physics
      - $E = m c^2$
      - $F = m a$
      - $F = G M m / d^2$
  - Elegant and simple expressions
    - Provide order, harmony, regularity
  - Where do laws of nature come from?
    - *Video: Evidence from Physics (Laws)*
- 

# Laws of Nature

- **Intelligible since created by Intelligence**
  - Mathematical laws of nature take greatest efforts of finest human minds to unlock
  - Must have come from a Mind far greater
- **Let's look closer at constants in laws:**
  - $E = m c^2$        $c = ?$
  - $F = G M m / d^2$        $G = 6.673 \times 10^{-11} \text{ N m}^2 / \text{kg}^2$
- ***Video: Evidence from Fine Tuning***

# Fine Tuning

- Constants in laws of nature are set to precisely what is needed for life to exist
- Examples of “fine tuning”?
- Fine tuning provides evidence of a Creator who “set all the dials” just right for us to be here

# Summary

- Scientific evidence that God exists:
  1. Big Bang
  2. Laws of Nature
  3. Fine Tuning
- Is this evidence absolute **proof** of God's existence?
  - Or does some doubt remain?

“God has provided each of us with the opportunity to make an eternal choice to either accept him or reject him. And in order to ensure that our choice is totally free, he puts us in an environment that is filled with evidence of his existence, but without his direct presence -- **a presence so powerful that it could overwhelm our freedom** and thus negate our ability to reject him.

“In other words, **God has provided enough evidence in life to convince anyone willing to believe, yet has also left some ambiguity so as to not compel the unwilling.** In this way, God gives us the opportunity to either love him or reject him without violating our freedom. For **love, by definition, must be freely given. It cannot be coerced.**” - *Dr. Norman Geisler*

# Leap of Faith

- **Not possible to absolutely prove the existence of God beyond doubt**
  - **God leaves room for unbelief because it's only way to leave room for true love**
  - **Our choice whether or not we will believe in God and seek to live our lives in accordance with His Will**
- **God wants us to voluntarily choose to know, love and serve Him**
